Trung Diec

Software Developer

Boston, MA | 781-888-6337 | Tdiec00@gmail.com | https://github.com/tdiec00 | www.linkedin.com/in/trungdiec

I am self-motivated and a career oriented software engineer. My persistence is second to none. I develop cohesive teamwork environments, and provide extraordinary communications skills. Providing a willingness to educate and learn from others, I am a great asset to any team.

SKILLS

- **Programming Languages:** HTML, CSS 3, JavaScript, Python, Ruby
- **Libraries & Frameworks:** Bootstrap, Node, React, Express, Rails
- **Additional Skills:** Git, Github, Slack, Responsive Design, Wireframes, React Styled-Components, Functional Based Programming

RELEVANT EXPERIENCE

Software Engineering Immersive | General Assembly | Remote | November 2021–March 2022

- [Brew Master](#): This React and Javascript based application allows users to sift through lists of various beers, including ingredients and brewing instructions.
  - React, React Styled Components, Axios, Javascript/JSX, Airtable
- [Athletic Performance Index](#): A React application containing a list of exercises broken down by each body part. Allows users to search through exercises with descriptions and gives the ability to add exercises to the database.
  - React, Axios, Javascript/JSX, MongoDB, Mongoose, Express, Tailwind CSS

Senior Inventory Specialist | Boston Medical Center | Randolph, Ma | April 2017–November 2021

- As the lone inventory specialist, launched and scaled a $100m inventory pipeline resulting in a swift promotion to Senior Specialist.
- Utilized self built excel spreadsheets/databases to track vendor specific information. These tools were utilized to track dynamic data and use cases.
- Trained, mentored, and developed 3 onboarding pharmacy inventory specialists as the organization expanded.
- Created workflows that optimized our limited staffing and space constraints.
- Focal point of communication between different departments.

Senior Supply Chain Specialist | Massachusetts General Hospital | Boston, Ma | April 2012–April 2017

- Promoted twice within a 2 year span. Bypassed the required 3 year period for the second promotion.
- Created and utilized training documentation for onboarding pharmacy technicians.
- Utilized 2 coinciding pharmacy systems (WorkflowRx and Epic) to manage the multi-million dollar inventory for one of the largest hospitals in the United States.
- Worked as a cohesive team member of over 200+ technicians, 70+ pharmacists, including over 15+ pharmacy departments.
- Gained vast knowledge and skills to work and assist in various other pharmacy departments and positions.
